CONSULTANTS PROFILE

INDIMA YABANTU (PTY) LTD

About us...

As the global manufacturing fraternity seeks to expand its footprint into uncharted territory, the demand for industrialization is rapidly increasing on the African continent, and particularly in South Africa. We have responded to the call by establishing ourselves as a dynamic and cross disciplinary team of experts focused on developing manufacturing plants in decentralized areas in order to solve an array of developmental challenges in the local space, to pave way for investment.

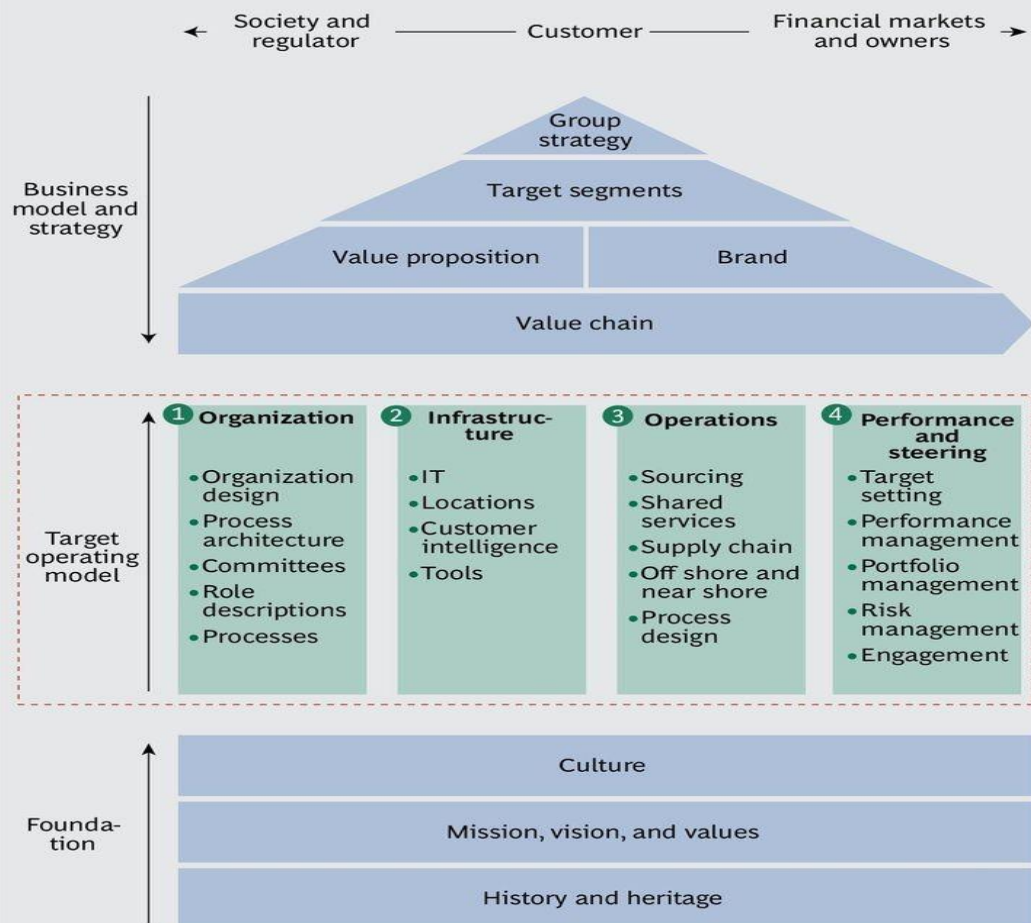

Our primary aim is to initiate and develop ultra-modern industrial facilities with cutting edge design technology and new-world innovation. Indima Yabantu will offer comprehensive developmental consulting services with technical and commercially viable solutions.

Though we are a newly established entity, we pride ourselves in our regional linkage capabilities, with an international institutional network of value chain supply and sourcing channels. Ensuring that our clients are set up for success from the onset, as manufacturing thrives on the existence of international value chain dynamism.

Our team has vast expertise in technical, industrial and commercial planning and conception of a multitude of developmental projects delivered on an international standard. For us, no project is too big or too small, we focus on delivering on our promise of quality and reliable service.

Approach...

EXHIBIT 1 | The Target Operating Model Requires Addressing Four Core Elements

Source: BCG experience.
